

Tire Pressure

Keep Tires Properly Inflated

Keeping your tires at recommended pressure pays double dividends. Properly inflated tires seldom overheat and fail, which saves rubber, and they roll easily, optimizing fuel efficiency.

SmarTire® pressure parameters:

FOR REFERENCE ONLY	TIRE PRESSURES	Front	Drive	Tag
Rim Size 22.5 x 9.00	COLD ; PSI (65 deg)	120	100	120
	WARM ; PSI (105 deg)	130	109	130
	HOT ; PSI (155 deg)	143	120	143
