Put an MCI coach on your team.

Discover why we're #1 in motor coaches

MOTOR COACH  
INDUSTRIES

*Going further!*<sup>SM</sup>

# Educate yourself on the ownership facts

With teams to transport, activities to organize and VIPs to escort, your school most likely relies on motor coaches at one time or another. By owning your own MCI coach, you can control costs while increasing visibility. MCI coaches are the best the industry has to offer, with top-flight comfort and a reputation for reliability and safety. We are the market leader, with a wide network of service, parts and technical support that keeps us on top—and on top of your needs.

## Econ 101

Supply, demand. Asset, depreciation. Owning your own MCI coaches lets you:

- Better manage travel costs
- Increase access
- Be more flexible in your scheduling

## Electives

MCI has three models that are suited to scholastic use:

- The J4500—luxury and dependability in the industry's best-selling model
- The D4505—An all-time best-seller, hard-working and good-looking
- The D4005—D-model dependability in a shorter, 40-foot version

## Art Appreciation

Some MCI coaches have won design awards, and all can make a visual impact with a decal or wrap featuring your school colors, mascot, motto or anything else. A coach with your school colors and logo raises your visibility wherever your teams and students travel. MCI coaches are just as attractive on the inside, featuring:

- Tiered theatre seating (J4500)
- Options such as electrical outlets for laptops, satellite TV, refreshment galleys and multi-screen video for movies and team footage
- Seating options—MCI offers roomy configurations perfect for larger athletic frames or for anyone who wants to stretch out and relax, as well as table options for working en route

## Mechanical Engineering

MCI's renowned reliability starts with monocoque steel construction and extends through state-of-the-art

*The J4500 offers the largest baggage capacity in the industry*

MCI® J4500

engineering. Plus, all models comply with EPA low emission engine standards, so you and your students can feel good about your role in protecting the environment.

## History: The MCI Period

Since 1933, MCI has been at the forefront of coach design, consistently finding ways to make vehicles ever more appealing and reliable. Many of our coaches have logged a million miles or more and are still going strong. Today, with factories in the U.S. and Canada, MCI is still dedicated to leading the way.

## Geography

MCI maintains nine service centers in the U.S. and Canada, plus a network of authorized MCI service providers that have earned our trust. And because some 60 percent of all coaches on the road today are MCIs, most technicians are familiar with our coaches. MCI owners also enjoy 24-hour Emergency Roadside Assistance.

*“MCI is the best coach for what we do. Ten years ago we bought a pre-owned 1980 MCI model and found it easy to maintain, but we knew it was time for us to upgrade. Within the next four years, our new MCI D4505 coach will pay for itself. It’s the best there is.”*

Clarence Jones, Transportation Director  
Lawson State Community College, Birmingham, Ala.,

Speak with an MCI sales representative to learn more about our models and how they might work for your school. See how MCI can take you further.
