

# Tight makes right: MCI Introduces Zafety Lug Lock®

**When it comes to wheel rim safety, offering a balanced load via proper number of studs and nut torquing is key.** Zafety Lug Lock® has been engineered to ensure that wheel nuts resist loosening, maintaining balanced loads and helping

to prevent wheel loss. Zafety Lug Lock® offers a unique design that uses the resistance between two nuts to minimize their ability to rotate and loosen. The effectiveness of Zafety Lug Lock® depends on proper wheel rim design and operating conditions; wheel nuts can continue to loosen as a result of temperature change, wheel end vibration and rim surface condition.

## Zafety Lug Lock®:

- Reduces the risk of potential wheel loss.
- Provides a clear visual check in all weather and light conditions.
- Lugs can be torque-tested without removal.
- Quick and easy to install/remove.
- Laboratory tested in severe vibration conditions.
- Field tested at high and low rotation speeds.
- 38mm (Stud Piloted), 33mm, and 32 mm (Hub Piloted) options available.
- Is reusable and recyclable.

Five locks are needed per wheel for a total of 30 per coach. Zafety Lug Lock is available in bulk or in single coach sets. Also, stock up on tools! Buy some for your shop and make sure that you buy one tool per coach in the event that a tire needs to be changed.

PART NUMBER	DESCRIPTION	PRICE
