**MAINTENANCE MATTERS**

**WINTER MAINTENANCE CHECKLIST**

When inspecting your coach be sure to:

- ✓ Check that the tire depth is within DOT standards and for signs of uneven wear. Replace unsafe tires immediately.
- ✓ Maintain proper tire pressure. Changes in ambient temperature can significantly raise or lower this pressure.
- ✓ Check for rust around the lug nuts. This is a sign that lug nuts are loose.
- ✓ Check that the engine block heater and auxiliary heater are functioning properly.
- ✓ Check the wiper system and ensure fluids are rated for the temperature ranges that will be encountered.
- ✓ Remind drivers of what to do in extreme weather conditions and be sure they know the number to MCI's Emergency Roadside Assistance: 800-241-2947.
- ✓ Check for A/C leaks and defects, especially in the winter. You'll have plenty of time to schedule repairs.
- ✓ Follow all guidelines in your coach maintenance manual.
