

Connect™

Building and modernizing your fleet? NFI Connect™ is ready for you.

Features.

NFI Connect™ is an exclusive, advanced telematics solution that gives you real-time oversight of your entire fleet, improving bus uptime and safety, and lowering costs.

Built-in Smart Technology

Our on-board technology communicates real-time GPS and analytic data to ensure optimal bus performance and safety.

Powerful Management Tool

NFI Connect™ monitors all critical vehicle on-board systems and data, while recording GPS location for real-time monitoring and two-way communication with buses.

Fully Customizable

Data reports are only important when the information they contain matters to you. We can adapt them to meet your specific goals and needs.

Remote Access + Real-Time Alerts

No matter your location or device, the entire suite of information is accessible - with real-time event notifications sent as issues arise.

Constant Collaboration

Our Active Centre Support team monitors your fleet and regularly sends interactive reports about the overall performance of your fleet.

Breakdown Prevention

Knowing about a problem before it becomes a breakdown is key to successful fleet management.

What's new.

NFI Connect™ is better than ever – newly enhanced, easy to use, and now works with nearly any vehicle in your fleet.

Now available on all NFI vehicles from New Flyer, Alexander Dennis, ARBOC and MCI.

Enhanced geographically triggered features such as zero- and low-emission zones, and automatic riding height adjustments.

Expanded memory and data capacity for enhanced reporting and troubleshooting capabilities.

Stronger cellular performance compatible with both 4G and 5G cellular networks.

Why NFI Connect™?

NFI Connect™ Analytics can be retrieved 24/7 via a laptop or mobile device.

Flexible Deployment

Easy to deploy, compatible with multiple vehicle platforms and requires minimal IT infrastructure.

Mobile Access

Fleet information at your fingertips with the easy-to-use mobile application for iOS and Android.

Stronger Performance

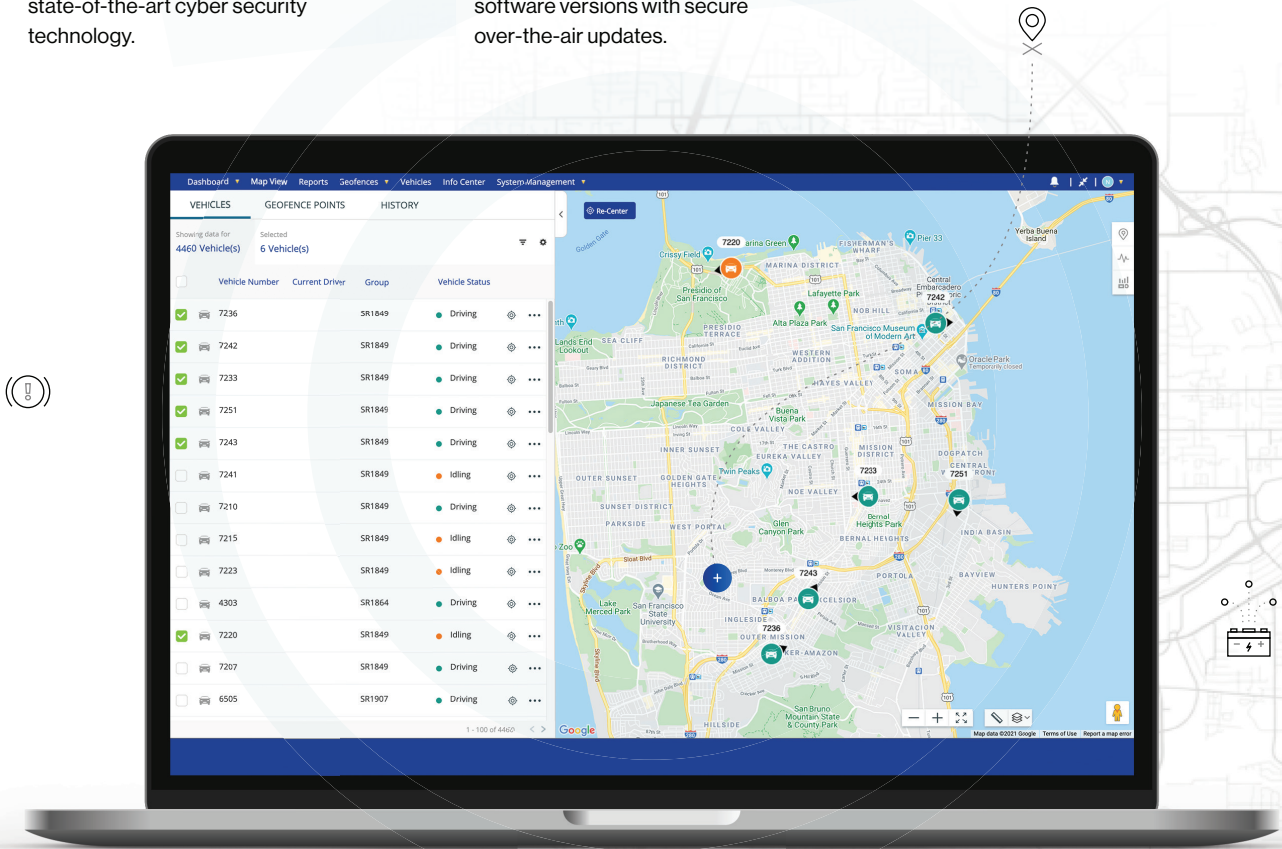

Improve your training strategies with insightful reports that show opportunities for improved driver performance.

Secure

Protected and monitored by state-of-the-art cyber security technology.

Always Up to Date

Each vehicle has the latest software versions with secure over-the-air updates.

Saves Fuel

NFI Connect™ finds fuel savings and energy efficiencies by identifying smart routes.

Solves Problems

Our built-in on-board smart technology communicates real-time GPS and analytic data to ensure optimal bus performance and safety.

Saves Time

NFI Connect™ gives you smarter oversight of your whole operation, ultimately improving bus uptime.

CONNECT 360™

Connect 360™, powered by NFI Connect™, is available on every NFI zero-emission vehicle and tracks battery-electric bus and coach performance using secure technology.

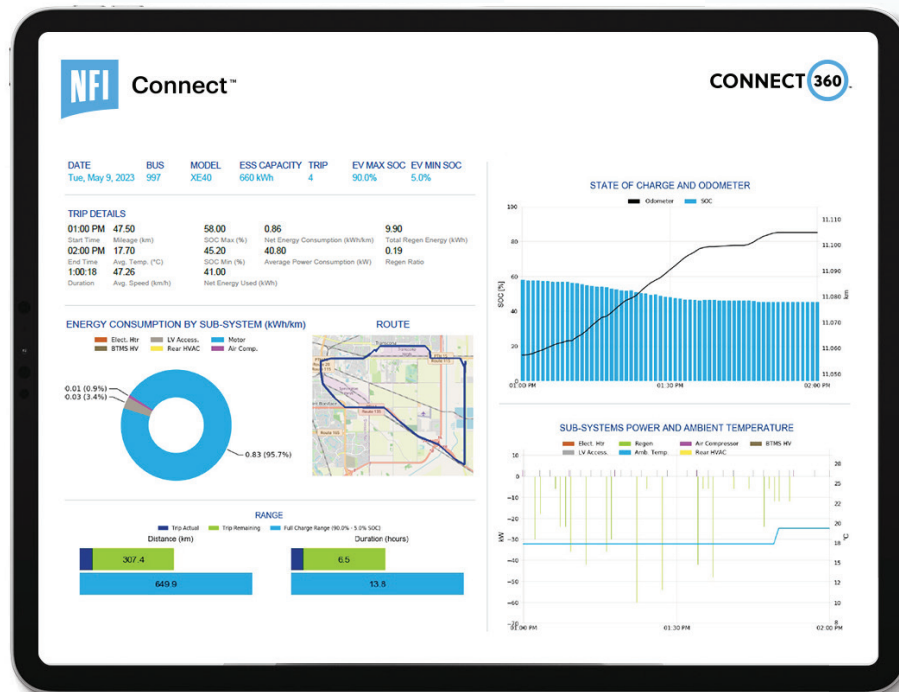

Connect 360™ is a customizable performance dashboard that provides smart analytic reporting to expand insight and intelligence for managing your zero-emission buses and coaches.

It provides an easy-to-read visual report for battery-electric bus and operator performance, allowing you to better understand this new technology to maximize efficiency, reliability and sustainability, and seamlessly transition to a high-performing zero-emission fleet.

Key analytics.

Real-time performance statistics are displayed in easy-to-read graphs and measurements. This helps you optimize your zero-emission bus and coach fleet – from drivers and passengers, to maintenance and scheduling teams.

- ✓ Battery state-of-charge
- ✓ GPS location and average speeds
- ✓ HVAC energy consumption per mile
- ✓ Regenerative braking
- ✓ Range achieved and remaining
- ✓ Energy consumption (kWh/mile)

Regenerative braking

Range estimation values

HVAC consumption/mile

Benefits.

Additional range capability with improved driver performance.

Decision-making information to **optimize charging strategies**.

Intelligence on how to **preserve battery energy** throughout the day.

Reduced operating cost and maximum fleet utilization.

VIC | VEHICLE INNOVATION CENTER

Key analytics for Connect 360™ were developed through the Vehicle Innovation Center, North America's first innovation lab dedicated to the exploration and advancement of bus and coach technology. To date, Connect 360™ remains the only reporting technology of its kind for battery-electric buses and coaches in North America.

About NFI.

Leveraging 450 years of combined experience, NFI is leading the electrification of mass mobility around the world. With zero-emission buses and coaches, infrastructure, and technology, NFI meets today's urban demands for scalable smart mobility solutions. Together, NFI is enabling more livable cities through connected, clean, and sustainable transportation.
