

D45 CRT CHARGE™ & D45 CRT LE CHARGE™

Zero-emission battery-electric
commuter coaches

The new D45 CRT CHARGE™ and the all-accessible D45 CRT LE CHARGE™ battery-electric highway coaches offer long range, high capacity, real-time performance analytics and unparalleled accessibility.

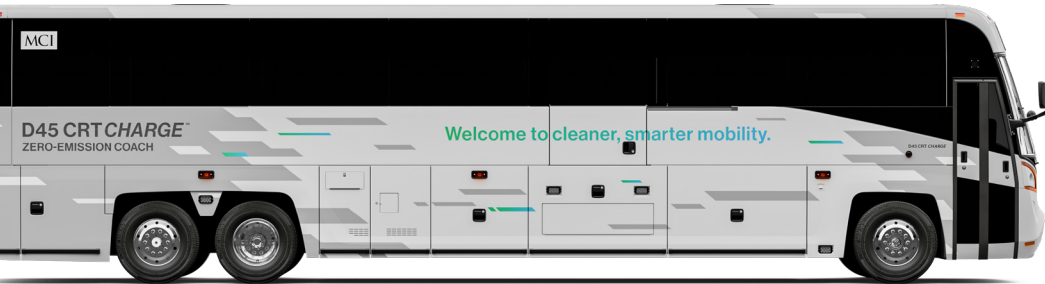

With electrically driven components and MCI's smooth riding suspension, passengers will experience a clean, quiet, and comfortable ride while powering through the steepest road grades.

MCI

Models.

Two models to choose from to meet your customer's needs.

Both models share the same electric platform supported by New Flyer's 50 years of zero-emission propulsion experience and NFI Infrastructure Solutions™, a service dedicated to providing safe, sustainable, and reliable charging solutions.

D45 CRT *CHARGE*™

Brings all-electric capability to the legendary high-floor commuter transit workhorse, now modernized with next generation innovation and style.

D45 CRT LE *CHARGE*™

Features a revolutionary patented low-entry (LE) vestibule with a seating area and ramp that significantly improves dwell times as well as the boarding and ride experience for all passengers, including those with mobility challenges.

The leader in green transportation.

In the last two decades alone, New Flyer has expanded in three categories of zero-emission buses — battery-electric, trolley-electric, and hydrogen fuel cell-electric — along with the widest range of charging options.

As part of NFI, MCI has leveraged this impressive history of electric-driven innovation and expertise into our electric coach product line, which makes us your best partner in battery-electric propulsion.

80

A 45-foot electric coach can avoid approximately 80 metric tons of greenhouse gas (GHG) annually.

How it works.

The D45 CRT CHARGE™ and D45 CRT LE CHARGE™ use an electric motor powered by energy stored in rechargeable batteries.

Benefits

A high-torque electric drive system delivering 90% energy recovery and designed to handle long-distance applications and highway speeds.

Next generation, high-energy, long-range batteries with plug-in battery charging to 100 percent in less than 4 hours.

Range of 225+ miles with 520 kWh.

Regenerative braking, capturing kinetic energy to recharge the battery system, making for highly efficient driving in start-stop traffic conditions.

High tech safety systems.

Optional Tire Pressure Monitoring System (TPMS) with integrated Patented Digital Wheel End Sensing (DWES) system that monitors individual wheel ends for potential issues.

Optional next-generation 360 camera that provides a birds-eye view around the entire coach to significantly aid vision while maneuvering at low speeds.

NFI Infrastructure Solutions™

NFI Infrastructure Solutions™ is a service dedicated to providing safe, reliable, smart and sustainable charging and mobility solutions. Learn what NFI Infrastructure Solutions™ can do for you at nfigroup.com/IS

What our Infrastructure Solutions team provides.

Supports mobility projects from start to finish.

Provides infrastructure planning and development.

Focuses on energy management optimization.

Provides cohesive transition of coach fleets to zero-emission electric technology.

Charging.

MCI battery-electric models comply with SAE J1772 standards.

The D45 CRT CHARGE™ and D45 CRT LE CHARGE™ are interoperable with charging systems available from: Siemens, ABB, Chargepoint, Heliox.

SIEMENS

ABB

-chargepoint+

heliox

Plug-In Charging

Depot charging reduces infrastructure cost, complexity, and battery degradation. Plug-in chargers can be used for overnight, mid-day, and on-route charging.

The D45 CRT CHARGE™ and D45 CRT LE CHARGE™ have a range of 225+ miles (520 kWh)* on a single charge. *Range is dependent on duty cycle

Bottom Charge	Top Charge	Charge Time
0%	100%	< 4 hrs
30%	80%	< 2 hrs

MCI

CONNECT 360

Connect 360®, operated by NFI Connect™, is a customizable performance dashboard that provides smart analytic reporting to expand insight and intelligence for managing your battery-electric coaches.

Additional range capability with improved driver performance.

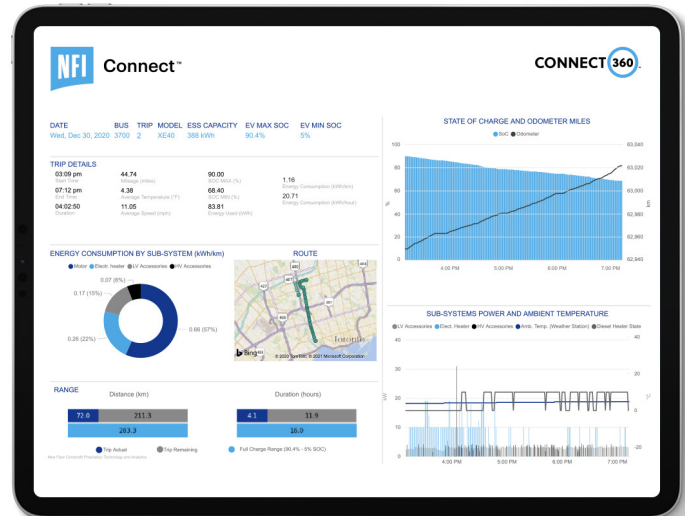

Intelligence on how to preserve battery energy throughout the day.

Decision-making information to optimize charging strategies.

Reduced operating cost and maximum fleet utilization.

Connect 360® is included on every new battery-electric coach. Learn more at nfigroup.com/connect

Reliable service and support.

MCI service and support delivers a relationship-driven and responsive approach to customer care.

Comprehensive support that includes in-field expertise, technical call center and 24/7 roadside assistance.

Ongoing technical training from the industry's only Automotive Service Excellence (ASE) accredited MCI Academy technician training center.

Customizable programs to fit your financial needs through NFI Financial Solutions™.

On-the-go support with MCI Operator's App and MCI Companion App.

MCI Service Center - from routine maintenance and warranty to complex troubleshooting, you'll find all the help you need.

Aftermarket parts support from NFI Parts™, the industry's largest parts supplier.

MC

Accessibility at a whole new level.

Developed with accessibility in mind, the electric D45 CRT LE CHARGE™ features a revolutionary patented low-entry vestibule, and a seating area and ramp that significantly improve the boarding and ride experience for passengers with mobility needs.

Benefits

Easy

Rapid entry and exit via two doors decreasing dwell time.

Safe

Level boarding, improved wheelchair securement, and a comfortable riding experience for passengers with varying mobility.

Efficient

Ramp that provides loading times comparable to low-floor transit buses with flip ramps.

Standard Mid-Coach Lift

The D45 CRT CHARGE™ comes standard with a mid-coach Braun wheel chair lift.
