2007 EPA Regeneration Tell-Tales

When you see this:
- Regeneration Lamp (Yellow)
- High Exhaust Temperature Lamp (HET) (Yellow)
- Malfunction Indicator Lamp (MIL) (Red)

Driver Interaction
Do this:
- Regeneration is required within the next 5-6 hrs of ON solid or 1-2 hrs (if flashing). Drive the coach at above 5 mph or perform stationary regeneration. Refer to the latest versions of MCI Service Bulletins 2959 for Cummins ISM engines, 2963 forCAT C13 and 2964 for DDC S60 at www.mcicoach.com. Tell-tale is OFF during regeneration.
- Engine derated, regeneration required. Increase speed above 5 mph or perform stationary regeneration within 30 minutes.
- Engine derated or shut down engaged. Renovation locked out. Contact authorized service center.

Other 2007 EPA Tell-Tales

High Exhaust Temperature Lamp (HET) (Yellow)
- Nothing. Tell-tale is only active when coach is below 5 mph. When illuminated, the exhaust temperature is > 750°F (400°C). This tell-tale can be ON in conjunction with other telltales.
- Tell-tale indicates a failure of an emission system component. Seek service from a Detroit Diesel service facility.

Malfunction Indicator Lamp (MIL) (Red) (on DDC engines only)
- Tell-tale is OFF during regeneration.
- Tell-tale indicates a failure of an emission system component. Seek service from a Detroit Diesel service facility.
- Engine derated, regeneration required. Increase speed above 5 mph or perform stationary regeneration within 30 minutes.
- Engine derated or shut down engaged. Renovation locked out. Contact authorized service center.

2007 EPA Engine Code Retrieval–Speedometer Display

to navigate to the FAULTS screen on the speedometer alphanumeric display:
– Press the MODE button 5 times, to display the DIAGNOSTIC screen.
– Press the SET button 1 time, to display the ADU screen.
– Press the MODE button 2 times, to display the FAULTS screen.
– Press the SET button 1 time, to display the Parameter Group Number (PGN) “code” screen.
– Press the SET button 1 time, to display the FMI screen.

Engine Code Example: 27 (4) – EGR Valve Position Circuit / Voltage Below Normal or Shorted to Low Source

To navigate to the DIAGNOSTIC screen on the speedometer alphanumeric display:
– Press the MODE button 5 times, to display the DIAGNOSTIC screen.
– Press the SET button 1 time, to display the ADU screen.
– Press the MODE button 2 times, to display the DIAGNOSTIC screen.
– Press the SET button 1 time, to display the Parameter Group Number (PGN) “code” screen.
– Press the SET button 1 time, to display the FMI screen.

Vehicle specifications may change without notice.
